The 12th annual Calico Ball was held Wednesday evening by the Veranda Club at the Norway Opera House. About 60 couples were present.

The floor manager was Wallace W. Sheen and the aids, Cleveland Goodwin, Osman Hill and Albert Fogg. The order of dances included 16 numbers and were printed on white cards with local advertisements on the back.

At intermission the ladies of the Veranda Club served ice cream and cake.

Social Party.

A pleasant evening was enjoyed Saturday night at the Grange Hall, by a party of young people, including Dr. Harold Allen, Dr. Harry Nevers of Lawrence, Mass., Dr. and Mrs. Leon Everson, Hubert Barker, Charles Smith, Arthur Steinhart of Lynn, Mass., Jesse Farnum, Genevieve Barker, Marjorie Barker, Harriett Smith, Marion Gibson, Marion Bradbury and Esther French of Solon. The evening was spent in dancing with music by Milliken's Orchestra. Mrs. Gertrude Barker and Mrs. Horace Smith chaperoned the party.

Mr. and Mrs. Arthur Hayden have moved into the house at the corner of Main and Pleasant streets, vacated last fall by F. H. Murdock and family.

Mr. Smiley was prostrated by a severe attack of the grippe about as soon as he reached Southern Pines and continued quite ill for some time. He is making a good recovery however, and will soon be his former self again in the bracing air of Maine.

Mrs. F. D. Kemp.

Mrs. F. D. Kemp, Springfield, Mass., died Monday, Mar. 29, after a sickness of over a year, though she was not seriously ill till a few days before her death.

Alice L. Bessey as a girl lived in South Paris and Norway. She was the daughter of Henry Osgood and Almira (Crooker) Bessey. Mr. Bessey was in the meat business in South Paris and later moved to Norway and had a meat market on the corner of Main and Bridge streets where the C. A. Richardson market now is.

For several years past Mr. and Mrs. Kemp have spent a number of their summer vacations at Norway, either at the Beals Tavern or in a cottage at Lake Pennesseewassee, and in so doing they renewed old acquaintances and friends, and gained new ones in this section, the home of their girlhood and boyhood, for Mr. Kemp is also a native of Oxford county. Having been successful in business Mr. and Mrs. Kemp had of late years taken more leisure and they seemed well fitted to enjoy life. They were in Norway a few days last summer, but even then Mrs. Kemp was not in her usual health, but was thought to be recovering from her illness of the winter before.

Mrs. Kemp is a niece of J. O. Crooker of our village.

Still Enthusiastic if School is to be Closed.

On Friday evening, March 26th, the Millettville schoolhouse was the scene of a lively party. The teacher, Eleanor Kneeland, had prepared a fine entertainment. It was a little farce entitled "An Evening Out," and many were the local hits which called forth much laughter and applause. 'Twas very well rendered and when the old black mammy entered with her "poh l'l boy" and made her plea she won her cause readily. Then came old Farmer Jones with his account of his faithful dog Spot and though the dog was not present, his master spoke well for him. There were general review questions given and answered on all past work and the entertainment ended in song. Then came the auction, for the ladies provided boxes full of good things to eat, which for various sums, the men proceeded to appropriate to themselves. Meanwhile the teacher assisted by Mrs. Geo. Westleigh, brewed a kettle of delicious cocoa. Of course we must give the name of the auctioneer, for he seemed a bit bashful,—new to the business you see, and needs to be advertised—Fred Jacob Lovejoy was the man.

When full justice to the supper had been given, the company enjoyed games until a late hour.

The sum of $10 was realized to buy a Flag for the schoolhouse and a few other little luxuries, for even if we have not the scholars to maintain a school another year, we plan to open the schoolhouse again in the future, for there are still growing youngsters.

If even only once during the course of a year you let opportunity in, it will pay you.
Isn't this true?

IT'S A MISTAKE

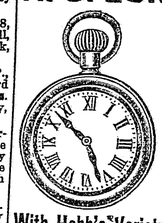

Made by Many Norway Residents.

Many people in a misguided effort to get rid of kidney backache, rely on plasters, liniments and other makeshifts. The right treatment is kidney treatment and a remarkably recommended kidney medicine is Doan's Kidney Pills. Norway is no exception.

The proof is at your very door. The following is an experience typical of the work of Doan's Kidney Pills in Norway.

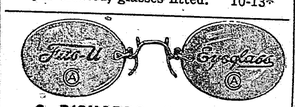

"Doan's Kidney Pills are the only kidney medicine I use and they always give me relief," says W. O. Needham, retired farmer, of Main St., Norway. "Several years ago I heard about Doan's Kidney Pills and I began using them. They got my kidneys working right and when that was done, the uric poison in my system was removed. I procured Doan's Kidney Pills at Stone's Drug Store and I know that they can be relied on."

Price 50c, at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills, the same that Mr. Needham had, Foster-Milburn Co., Props., Buffalo, N. Y. 14-15

TEN WEEKS IN BED---EMINENT PHYSICIANS FAILED---WONDERFUL RECOVERY.

I wish to inform you of the great benefit I have derived from the use of Swamp-Root. I had been a sufferer for more than twenty years from kidney and liver trouble and was almost constantly treated by the most eminent physicians who could only give me temporary relief. I had been in bed ten weeks when I began the use of Swamp-Root. Inside of twenty-four hours I could see that I had been greatly benefited. I continued to use Swamp-Root until I had used several bottles when I really felt that my old trouble was completely cured and I am positive that any person suffering with kidney or liver trouble can be cured by the use of this preparation.

I am now in the best of health, better than I have been for ten years or more. I do not know how to express myself as strongly as I desire, in favor of Dr. Kilmer's Swamp-Root, as I am sure that it saved my life and that my good health is due entirely to this great remedy. I heartily recommend it to every sufferer and am confident they can be benefited as I have been. It is a pleasure for me, gentlemen, to hand you this recommendation. MRS. H. J. PRICE,
1406 Center St. Portsmouth, Ohio.

Personally appeared before me this 13th of September, 1909, Mrs. H. J. Price, who subscribed the above statement and made oath that the same is true in substance and in fact.

R. A. CALVERT,
Notary Public.

Letter to Dr. Kilmer & Co., Binghamton, N. Y.

Prove What Swamp-Root Will do For You

Send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample size bottle. It will convince anyone. You will also receive a booklet of valuable information, telling about the kidneys and bladder. When writing, be sure and mention the Norway Weekly Oxford Co. Advertiser. Regular fifty-cent and one-dollar size bottles for sale at all drug stores. 14-17

WHEN THE ICE GOES DOWN.

Broken the mighty grip of the King
Who rules in the winter time,
When his legions from Arctic regions swing
Toward the South with song and rhyme,
Conquering then the russet land,
Burying deep with snow,
Prisoning streams with steel-blue bands,
Death-carrying as they go.

Broken, defeated, he now retreats,
Melted his legions are;
Oncoming Sun his rear-guard meets,
As the head for the Polar star,
While the robins sing for the victory,
The violets bloom again
And the icy floes to the ocean go,
Like corpses from corps of men.

So the souls of women and souls of men,
Frozen and maimed by Fate,
When the winter of life so long has been,
Bloom into real life, though late;
When their troubles go and the life-sun glows,
When the ice floats down;—ah, then
Blooms joy, like the fragrant, bursting rose;—
Life's summer comes back again!

The World's Greatest Automobile Trade-Mark

The "Triangle on the Radiator" is the best-known of all automobile trade-marks. It stands for more in the estimation of the public than does any other insignia on a motor car. Thousands of buyers ask no other evidence than the Hudson Triangle.

They know its record for quality, prestige, automobile satisfaction.

The Car Behind the Trade-Mark

The Triangle has become great *because it is behind it.*

From the Triangle on the Radiator to the tail light every atom of the car has been tried in the crucible of the Hudson Engineering Staff.

Only accident or misuse can prevent the owner getting 100% pleasure and service from his car. In the hands of tens of thousands the world over, its supremacy is demonstrated.

The Company Behind the Trade-Mark

Success is the best guarantee of value.

Inferiority always fails. The dazzling white light of competition reveals every defect, pitilessly tears the veil from every subterfuge.

The Hudson Motor Car Company is as fine as the Hudson Car. Its marvelous success has resulted from giving the public what it wants at the price it wants.

Every Hudson owner is a Hudson booster because he finds in his car exactly what the company says is there.

The "Triangle on the Radiator" is the emblem of the Hudson Motor Car Company. Buyers regard it as a bond guaranteeing in their car everything needed to make it as good an automobile as the world's best engineering skill can produce.

Come—see the Hudson Six-40 and Super-Six. The cars that have swept competition aside like cobwebs. At $1550 and up these cars, bearing the famous "Triangle on the Radiator" are selling everything on the market.

Allison Libby Thomes.

Harrison has been called upon to part with one of its oldest citizens, Uncle Allison Thomes. He was born in Gorham, Oct. 21st, 1825, being nearly 90 years of age. In December, 1913, he was presented with the Boston Post gold headed cane for being the oldest gentleman in town.

Mr. Thomes was a very interesting person to converse with and retained his faculties to an unusual degree, always at work n spite of his years.

He was married fifty years ago to Melvina Buchnell of Harrison, who died about eleven years ago. During all their married life they made their home on the Buchnell farm which was Mrs. Thomes' childhood home. They were very thrifty, prosperous farmers and gained a competence of which they might well have been proud.

A few years ago he sold his farm to his grand nephew, Elmer Thomes, and has resided with his only daughter, Hortense M., wife of Fred B. Pike of Cornish.

Mr. Thomes came to Harrison to visit relatives about three weeks ago, and when a short distance from his old home, he slipped and fell on the ice breaking his hip. They carried him into the house where he had spent nearly his whole life and in spite of all that medical and, a nurse and friends could do, he never rallied on account of his advanced age.

The funeral services were held at the home of Elmer Thomes, Saturday, March 20, at 1.30 p. m., conducted by Rev. L. F. McKenney of Bridgton. Burial in the family lot at Cornish.

Pitts, who was the son of Samuel Pitts and whose home was on the farm now occupied by Howard Randall.

How Paint

The first cost of a good job of paint—Devoe—is $50 (average size, of course). The first cost of a second or third or fourth rate job, $55 to $100.

The wear is likewise. The better you paint, of course, the longer it wears. And the more you pay for your job, the shorter it wears!

Devoe is one of a dozen good paints. There are hundreds of bad ones. As likely as not, Devoe is the only good one in this town. 14

BEHIND the humor in this drawing we can read a little MORAL. Many folks are as SOFT as the snow man when the SUN of PROSPERITY beams down on them. They hold up a thin umbrella of GOOD INTENTIONS and cry: "See; we are playing safe. We're not spending more than we make." But the cloud SUDDENLY hides the sun. They are left a shapeless, melted mass. Then they are SORRY they didn't contract a steady, thorough BANKING HABIT.

JOSEPH ANDREWS' LETTERS

I am sending you cuttings from the Tropico and Glendale papers with regard to the sad and tragic death of Henry Burbank, that will be of interest to many of your Fryeburg and Lovell readers, and others in near by towns:

"Monday morning, Jan. 18th, about 8 o'clock, the lifeless body of Henry Bailey Burbank was found hanging in a closet at his home, 307 Blanche avenue, Tropico. The young man had taken his life some time during the night. Ill health is the cause assigned for his rash deed.

"Mr. Burbank had resided with his mother at the above address for the past four years. He was born in the state of Maine 36 years ago and was a carpenter by trade.

"The aged mother, who is prostrated at her son's death, is the only relative in this vicinity.

"The remains are at the undertaking parlors awaiting a coroner's inquest and message from relatives in the East.

"On Tuesday afternoon at the home of his mother ocurred the funeral survices of Henry Burbank, whose sudden death ended a life of unsual beauty and tender devotion. Rev. A. B. Shoemaker of Covina, a friend of many years' standing, read the funeral sermon and spoke comfortingly of the life of helpfulness and loving service which he had been privileged to know in Mr. Burbank. Mrs. John Hobbs and Mrs. A. Stephenson sang two beautiful selections and the many lovely floral tributes were evidence of the sympathy and love of friends and neighbors. Hal Davenport, Dr. Morse, W. G. Black, H. W. Hutt, W. Heald and M. Ludden acted as pallbearers. Scovern-Letton-Frey, the local morticians, ably took care of the arrangements. Mrs. Burbank's niece, Mrs. Fitch of San Diego, came up for the funeral and Joe Andrews, a brother of Mrs. Burbank, plans to make his home with his sister."

In my last letter to the Advertiser I stated that I planned to spend the winter in California, and with that object in view I started West the day after Thanksgiving. I visited over Sunday with my old time friends, Henry Heald and wife at Madison, Wis., whom I found in good health for people of their age. From there I went to my Old Homestead Farm near Hurley, S. D., where I remained about three weeks. And while there I received letters from some of my friends advising me not to go to California on account of the mental condition of my nephew. So I returned to Ohio and planned to spend the winter there, and about next June and July in Maine and go to California about next September. But on January 18th I received a telegram from my sister saying that Henry had hung himself that morning. So I made my preparations in haste and the next day started on my long trip, and on Saturday morning arrived safely here in Tropico.

Henry Bailey Burbank was born at West Fryeburg, Maine, some 37 years ago, the son of Abbie A. and E. W. Burbank. In the latter part of December, 1897, he and his mother left their home at West Fryeburg (a home none too pleasant) and came to make their home with me at Hurley, South Dakota. For the first three years Henry worked for me upon the farm. Then for a change he worked one year at the carpenter trade. And the next year he worked for his cousin, Andie Powers, upon his farm, and his sixth and last year as a common laborer he worked for me. I then rented him the farm for seven years, during which time, by hard work, good management and industry, he accumulated the snug little sum of between $6,000 and $7,000.

Five years ago, owing to failing health, he and his mother with Uncle Joe as chaperone, came to California, and located in this beautiful little city of Tropico, but a few miles distant from the great city of Los Angeles with which it is connected by the electric cars which give a fifteen minute service. During his first two years here he bought the lots and built three modern five-room bungalow houses for himself and one on contract for another party. Two of these houses he sold at a good advance and the third he keeps for his home. It has bath room, hot and cold water, electric lights and gas. His third year he worked out at carpenter work on near-by buildings.

Two years ago, owing to the financial depression, but little building was going on and he could find no work to do. There was not a lazy bone in his body, and as he could find no work he had nothing to do but sit around and think. He read extensively from the "Menice" and other Anti-Catholic literature, and as he was of a highly nervous temperament, his mind became unbalanced.

About a year ago he thought himself in a trance. He thought the Lord had sent great work for him to do, which at the proper time would be revealed to him. He searched the Scriptures through and through, searching for certain passages of scripture which he declared he had heard "Uncle Joe" or Andie Powers read from their Bibles years ago while working for them upon the farm. He bought a typewriter and wrote many letters very similar to the one published in the Advertiser in January 22d issue. I received two of these letters, Andie Powers, several. And how many more he wrote is not known. He wrote a sketch of his life and the trials and troubles of his home and school boy days. This he showed to a lady and asked her to look it over and correct the mistakes. This sketch he either burned or mailed to some of his friends as it was not among his papers. Within the last few weeks he became more nervous and seemed to realize that he must choose between the insane asylum or death, and he chose the latter.

To the last he attended strictly to his business affairs. He did not owe a dollar, and all his property except his home he had turned into cash, and had deposited it in the banks here mostly in his mother's name, except $600 which he had loaned to a personal friend. His will in favor of his mother, and in case of her death, to his sister Fannie, was made some ten years ago at Hurley, S. D., and was witnessed by two witnesses who are still living there and proper steps are being taken to have it probated here.

His mother says he was a dear good boy to her. About two weeks before his death he bought her a fine three piece, $90, walnut bedroom set, and during the last few months he had bought much valuable and useful furniture which he thought would add to the comfort of his mother's home. Only the day before he died he drew one hundred dollars from the bank that his mother might have money for her personal use.

He seemed to fear that in some of his insane moments he might do harm to his mother or to others, and so decided to end it all by suicide and thus save others from danger, and give his own tired brain eternal rest. It was his request often expressed that in case of his death, his mother should give his father $500, which she will do as soon as the estate is settled, which will probably be in about five months.

Henry was a warm hearted, generous young man, with few faults and many virtues. He did not use tobacco in any form, did not drink, and was not addicted to profane or vulgar language. His tragic death is a severe blow to his mother, of whom he was very tender. Mrs. Burbank will continue to reside in the cozy little home left her by her son. She has many kind neighbors, who all seem to take a deep interest in her welfare. She is in hopes that her daughter Fannie, wife of Elsworth Gile of Jackson, N. H., with their two daughters will come here and share with her her California home.

I expect to remain here as long as needed, and while here visit the two great expositions and hunt up most of my old time California friends who are living in this section. I would like to get back to South Dakota in May, and to Ohio in June, and later in the season take a trip back to my old stamping ground among old Oxford hills, and greet once more the few remaining friends of my childhood days. Evidently this is to be California's most prosperous year. Vast crowds of tourists will cross the continent, and many from over the seas will come to view the wonders of the two great expositions. Nature has been kind to the Golden State, for no killing frosts have come to blight the splendid prospects of the citrus friuts, and the welcome rains have come to make green the mountain sides and the desert valleys. But I must draw this letter to a close.

March 17, 1915.

I have been in California now for nearly two months. The winter was rather cold and rainy, but with no hard freezes, so that the fruit and grain prospects of the California farmer were never better.

My sister, Mrs. Burbank, and I spent ten days at Long Beach, the "queen of the beaches," with a population of 40,000. It has a fine harbor in which there is a large Craig ship building department. There are many great manufacturing plants in the city that give employment to many workers. But its chief industry is the caring for all the year round tourists who come here in vast numbers. I think I am safe in saying that more than half of the houses in the city are apartment houses, flats, boarding houses and hotels. All the way from the 75 room apartment houses, down to the neat and comfortable three room apartment. I inspected one 50x150 foot lot on which there were built six fine modern three room bungalows, all on the back end of the lot, while the front of the lot was kept for a lawn and play ground. These houses were all modern with folding beds, toilet, hot and cold water, electric lighted, with gas heaters, a cooking range, and furnished all ready for housekeeping and rented for about $25 a month.

My sister's daughter now living at Jackson, N. H., Mr. and Mrs. Elsworth Gile with their two daughters Beatrice and Mabel, expect to soon move out here and make their home. As soon as they come I will be foot loose, and expect to start on an exploring tour, that is, visit California's two great Expositions. I would advise any of your readers who may come, to come or go via the Sante Fe route and see the World's greatest wonder, The Grand Canyon of the Colorado in Arizona; also the Petrified Forests. The Canyon is about 65 miles from Williams, Ariz., and the cost to me was about $14.00 for one day and night. I found it well worth the money.

The past week it has been very fine, about like June back in the east. From letters and papers received from my old home in South Dakota, I learn that it has been one of the hardest winters ever known there. Many bad storms and five of six feet of snowfall all told. As soon as I complete my rounds in California, I expect to return to South Dakota and from there go to Ohio, and if the blueberry season holds on late I may continue my wanderings to the hills of old Oxford county in the Pine Tree State.

NATURE STUDY IN THE SCHOOLS.

A School Review.

About two decades ago the people of New York City became alarmed because it had become necessary to help many people who had come from the rural districts, having abandoned their farms. At a conference of philanthropists the reason was sought and remedies prescribed. A leading director of the New York Farmer's Institute claimed that the people had either been educated away from their environment or had not been educated to appreciate it.

A short time ago a parent came to my office and complained that the teacher at their school was wasting too much time having the children hunt bugs and sticks and leaves, and everything but useful things. This parent thought that such time could better be utilized in teaching writing and arithmetic, rather than throw away valuable time for something that would never be of any value to these rural boys and girls.

I fully appreciate the point of view of the parent, because how could a parent agree to the studying of something that seemed useless, if its application was not understood? If the child had been taught some elementary facts of agriculture that it already partially knew, it would have been commendable or reasonable, and the complaint would never have been made.

So, why shuld we devote a part of some afternoon in each week to nature study? All will agree that it is desirable to interest the children of the country in farming, and I want to say right here that the first step in this direction is Nature Study. Why?

It was in Westchester County, New York State, 1893, that a systematic teaching of Nature Study began. It is conducted through Cornell University with an annual appropriation from the State to aid the same.

The course of Nature Study for the grades was arranged and has since been published in book form by a director of the work. It is this text that I have placed in each school and asked each teacher to present one lesson each week appropriate to the season.

As a boy at home on the farm, I always realized that there was something in nature that was mysterious and yet enjoyable. That something, I knew not what it was. The mysteries of nature always hung over me as awe-inspiring and not as an open book and companions. It was not until I had studied the sciences in High School and College that I began to get acquainted with the facts of nature, when they no longer seemed mysterious.

I am desirous that the boys and girls should not wait as long as I did to find out these facts of our every day surrounding with which we come in contact oftener than we will need to use arithmetic and writing. The last named subjects have their place as well as other subjects, and no subject that can rightfully come in the common school curriculum should be excluded, but have its proper place and attention.

City children have been given courses in nature study during their vacations in the country, so that many of them know more about nature than the country boy. Many a country boy and girl has become coarse and vulgar in delightful nature surroundings, because he knew nothing better to do. Therefore, for the want of something better to do, because of the lack of knowledge, the whole trend of his life was changed.

Nature study gives the child practical and helpful knowledge. It cultivates ability to look and see what is true and a power to impart the same. All things seem possible in nature, yet they are always proven by searching for the truth. Probably half of falsehood is due to lack of power to detect the truth and express it. In such acquired knowledge, the powers of observation and expression are developed. It cultivates a love for the beautiful, as one discovers color, form and music. A person who cannot enjoy all of the above, needs consideration rather than censure, as the better side of his nature is undeveloped.

The student of nature sees in his environment the beauty of the fleecy (cumulus) cloud, the beauty of the oriole and tannager, the purple shadows on the snow and the sheen of the butterfly's wing. He reads the music score of the bird orchestra and recognizes each separately acquired friend by its note. The patter of the rain and the sighing of the wind through the pines are all knowledge to the nature student.

But, more than all, nature study gives the child a sense of companionship with life out of doors, and a knowledge of the lasting love of nature that lifts him from vulgar possessions. Anyone not in sympathy with the introduction of nature study into our schools is prompted not by positive but by negative knowledge of the subject.

Burned to the Ground.

John Rounds' house was burned to the ground last Friday evening at about five o'clock. The fire started from some unknown cause, in the roof about ten feet from the kitchen chimney. There was a strong March wind blowing and fire quickly destroyed the buildings.

Master Hamilton was sent to the near neighbors, who willingly did all they could to save the furniture, but could save but very little.

Mr. Rounds had killed a large hog but a short time ago and that was a total loss on hand. There was a small insurance on the buildings.

At present Mr. and Mrs. John Rounds are stopping with Chas. Lewis and later they will move into Sidney Donald's house.

SPRING MILLINERY OPENINGS.
Norway.

It hardly seems possible that spring is again with us and that winter is gone, but so the milliners say, and the millinery never looked prettier or was more becoming to the wearer.

Every season new colors, shapes and trimming designs are introduced. This year we notice that:

Sand shade, reseda green, tete de negre, pink, blue, black and white are the leading colors.

Small effects still prevail, the small brim hat is rather favored. Tricornes, and quadricornes are used. The Shepherdess shape is good; also sailors both wide and narrow brims, the aeroplane and toque.

Trimmings, small fruits in their natural and fancy colorings, small fancy pompons and wings; small flowers are strong; fancy mixture in colors. The demand for ribbon is gaining. Ribbon streamers are very smart. Ostrich feathers, military effects are well received.

Hats made of chiffon, net, lace and maline, flat braids, rosettes and smart wired French bows of both velvet and faille ribbon.

Styles in women's millinery have never been smarter nor of a more attractive type. Particularly well liked are the bonnet effects on the military order. Sailors, turbans and tricornes are leading shapes. High-lustered straws and rough effects are seen, milan being very prominent.

Turbans suggestive of the military and called Tipperary or Belgian are extremely popular. These turbans are small and soft and worn on the side of the head, showing the well dressed hair. The crowns of some are indented. To accentuate this idea many have ribbon bands about the brim, ending in the back with a bow and streamers of various lengths. Others are wired, the loops and ends standing away from the brim.

The brims of turbans many times are higher in the front and sides than in the back. This is usually the case when streamers are used.

Sailors are both elongated and round. All hats should be worn well over on the right side and up on the head, showing the hair on the right side and back of the head.

Frequently the upper portion of a hat is of silk or satin in one of the new light shades, such as putty, sand or gray and the underbrim of a darker color, such as tete de negre, green or blue.

Maline is much used on hats. It is used either in the making of the entire hat, or just for the narrow brim. Sailor shapes are especially attractive with narrow brims, either of shirred or plain malines, with the edges bound with satin. The crowns are usually of milan or hemp. Lacquered flowers on the order of flat asters are arranged between the layers of malines.

Ribbons and flowers are used in trimming. They are placed around the upper edge of the brim about an inch from the top in a wreath effect, or are laid stiff and flat against the brim. Gros grain and velvet ribbons are used in the making of smart little bows or for the banding of the brims of turbans, with streamers in the back. Little cockades of ribbon are used in the trimming of tailored modes. Small bows are used in combination with flowers. Small flowers in attractive colorings are used in combination and give a dainty touch to the light sand and putty shades or to the dark shades. Flowers made flat are appliqued to quills, presenting a novel effect. Laquered flowers, with their shiny surfaces are in attractive colors.

Mrs. R. L. Powers' show window is attractive in white and shows the millinery to good effect. She has for assistants, May Curran, Mrs. Edith Robbins, Mrs. Estelle Bell and Lillian Powers. She shows at the opening 75 different models. The double brim sailor hat of black net has folds of black satin and an ostrich plume between the brims. A black Milan straw turban, trimmed with four fancy black and white wings. A girl's hat of pink chiffon, plaited lace around the crown and brim, banded with narrow black velvet on which is a wreath of small flowers, the velvet tied in a French bow. A girl's hat of white hemp, poke effect, that has a row of lilies of the valley standing up around the crown and a row coming out around the brim, separated by black velvet ribbon brought over the back in a bow, a wreath of small roses over the band.

A rose turban, the American Beauty shade black bow on side. A small violet hat of maline with a band of violets and maline wings. A sand shade sailor hat, brim of sand chiffon with a wreath of flowers between, Alice blue velvet ribbon across the hat, with French bow. A woven straw, black and white crown, narrow black velvet put on in lattice form for a band, black rose petals bunched on brim on each side. A girl's hat in old rose shade, black satin facing on upper brim, pink veinless roses, velvet ends from bow under brim. Tricorne black hemp, a wide black and white checked ribbon aeroplane bow. A narrow brim sand hemp sailor with a narrow cherry velvet French bow in front, celluloid flowers. Long flat Dutch blue turban with different colored velvet daisies in wreath and spikes. A long sand turban with a green velvet brim, a cluster of combination fruits and grains.

Miss H. M. Taylor shows her millinery in the window over a green setting. There is one large beautiful potted plant. Inside the decorations are plants from her own collection. Her milliners are Mrs. Gertrude Allen, Mrs. J. L. Finney and Mrs. Fred Moore. They have 75 trimmed hats.

A black lace hat has a wide sheer wireless brim. The rose well down on the brim shows through from the under side. A violet shade Georgette model, with violet roses in the red and purple shades. A little bronze tam, wreath pink flowers with baby ribbon in bow to match the flowers.

A sand shade sailor in military blue, trimmed with ribbon and clusters of small blue roses same shade with pink centers. By the way, the sand and putty shades are a neutral color, and may be trimmed with colors to suit the wearer.

A shepherdess shape, sand color, draped with broad rose ribbon in several shades, a long bow falls under the brim from the back. The ribbon on the hat caught with fruit in same shades. A Glengarry turban in Delph blue, faille ribbon, Scotch bow, cluster cerise velvet apples.

A natural shade military hat trimmed with military pomp, faced with Belgian blue shade. An enveloped style in negre, satin straw, cerise pins to pin the bow of negre ribbon. A Cabriolet hand-made crown of sand satin, black Milan brim, green daises appliqued on brim, narrow black velvet ribbon. A flower toque, pink rose crown, violet and foliage brim finished with a knot of green ribbon to match the foliage.

MRS. WILLIAMS' LONG SICKNESS

Yields To Lydia E. Pinkham's Vegetable Compound.

Elkhart, Ind.:—"I suffered for fourteen years from organic inflammation, female weakness, pain and irregularities. The pains in my sides were increased by walking or standing on my feet and I had such awful bearing down feelings, was depressed in spirits and became thin and pale with dull, heavy eyes. I had six doctors from whom I received only temporary relief. I decided to give Lydia E. Pinkham's Vegetable Compound a fair trial and also the Sanative Wash. I have now used the remedies for four months and cannot express my thanks for what they have done for me.

"If these lines will be of any benefit you have my permission to publish them."—Mrs. SADIE WILLIAMS, 455 James Street, Elkhart, Indiana.

Lydia E. Pinkham's Vegetable Compound, made from native roots and herbs, contains no narcotic or harmful drugs, and to-day holds the record of being the most successful remedy for female ills we know of, and thousands of voluntary testimonials on file in the Pinkham laboratory at Lynn, Mass., seem to prove this fact.

If you have the slightest doubt that Lydia E. Pinkham's Vegetable Compound will help you, write to Lydia E. Pinkham Medicine Co. (confidential) Lynn, Mass., for advice. Your letter will be opened, read and answered by a woman, and held in strict confidence.

A submarine sailor, color battle gray, trimmed with same color moire ribbon, bow on side, four clusters of grapes in purple, olive green and American beauty pink. A Tommy Aikins turban with French blue band of black velvet ribbin, tailored bow with ends on back and fancy pin on front. A battel model, barnyard straw, navy blue crown sprinkled with large black beads, black ribbon with cerise picot edge in shoe bow.

A white hemp Chin Chin sailor, two pair small white wings standing up in front, band of black velvet tied in a square bow in back.

2 Drops of "GETS-IT," Out Comes the Corn!

It's the World's Wonder; Never Fails.

You'll make goo-goo eyes at your feet, after you use "GETS-IT," and you'll find the places where those blankety corns used to be, just as smooth as your cheek.

"How Wide Is a 'GETS-IT' Smile? Well, a Good Deal Over 2 Feet!"

There's no corn or callus among the millions of feet in the world that "GETS-IT" will not remove—there's no escape. "GETS-IT" is the new way, the simple, common-sense, sure way. It does away with greasy ointments, salves, pads, cotton rings, harnesses, knives, scissors, razors, files, and the limping and the painful pigeon-toe walk of so many corn-pestered people. All you do is put 2 drops of "GETS-IT" on—the corn shrivels up—and good bye. Nothing else in the world like "GETS-IT." Millions are using it. There's no pain, no trouble, no changing shoes because of corns.

"GETS-IT" is sold by druggists everywhere, 25c a bottle, or sent direct by E. Lawrence & Co., Chicago.

When You Want a Thing Done RIGHT, Do It YOURSELF

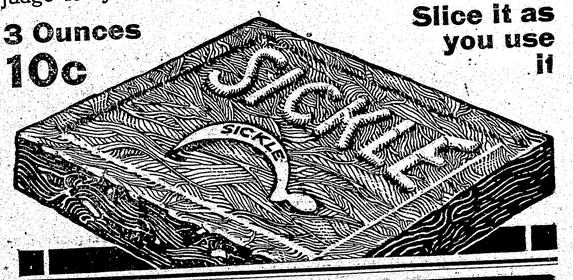

Real tobacco flavor depends upon the leaf being preserved in its natural state, possible only by pressing the leaves into plug form and keeping it in by covering it with a natural leaf wrapper. The natural flavor and strength of tobacco escape when cut or granulated.

Take a Plug of Sickle that is even thoroughly dried out so that when you whittle it off it crumbles into dust, but it will burn and smoke smooth and cool as it has all of its original tobacco flavor preserved, unevaporated in Plug Form.

Whittling a pipeful is little trouble, amply repaid in both quality and quantity. Try this experiment and judge for yourself.

AN UGLY ABSCESS

Caused Much Trouble, but was Healed by Hood's Sarsaparilla.

Portsmouth, N. H., Feb. 16, 1915.—Mrs. Charles Bearse, who lives at 45 Coffin's Court, in this city, makes this statement:

"The beginning of my trouble was a sore or abscess that gathered in the corner of my left eye. It discharged continuously for a year and eight months, and nothing seemed to heal it. I consulted eminent physicians, who said the eruption would never heal without a surgical operation. I was much rundown and dreaded to think of an operation.

"I remembered that four years before I had taken Hood's Sarsaparilla with benefit, and I decided to take it again. I seemed all worn out, and my blood was not right.

"After I had used four bottles of Hood's Sarsaparilla the abscess had a more healthy appearance and the discharge was less. When I had taken seven bottles the sore had entirely disappeared, leaving only a slight scar. When I told the doctor Hood's Sarsaparilla had cured me he was dumbfounded, and said 'Hood's Sarsaparilla certainly has done wonders for you.' I had better appetite and was in better health in every way."

Remember to ask for Hood's Sarsaparilla and insist on having it.
